2026 PRODUCT CATALOG

SILENT INVERTER GENERATOR
OPEN-FRAME INVERTER GENERATOR

BUILDING AN OPEN POWER ECOSYSTEM

MC Power, a core brand under Qianzhuang Technology, specializes in the development and innovation of modular intelligent power systems, committed to reshaping the future of energy through modular architecture and smart technologies.

Unlike traditional integrated power systems, MC adopts a modular platform design that enables flexible combinations of power generation, energy storage, intelligent control and application modules. This allows power systems to be configured and expanded with greater flexibility and efficiency for different scenarios.

Powered by an intelligent energy management platform, MC delivers smart coordination, remote monitoring and lifecycle optimization solutions, widely applied in construction equipment, mobile lighting, energy storage systems, OEM applications and diversified industrial scenarios.

MC is committed not only to delivering products, but also to building an open, efficient and sustainable smart power ecosystem, creating long-term value for global partners through lower total cost of ownership, higher operational efficiency and scalable energy solutions.

LIFECYCLE COST OPTIMIZATION

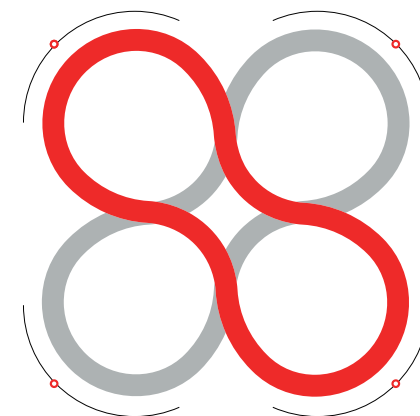

A Systematic Approach to Cost Reduction & Efficiency Improvement

Military-Grade Quality

Engineered to perform reliably even in the harshest environments.

Intelligent Connectivity

Cloud-based smart management for real-time monitoring and optimized equipment performance.

Rapid Deployment

Reduce installation time and enable faster response and delivery.

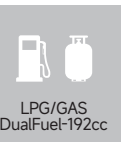

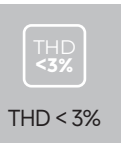

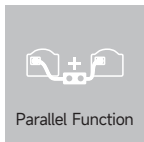

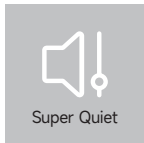

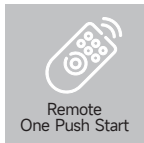

Scalable Expansion

Protect initial investment with flexible future upgrades and expandable power capacity.
